

Folder

**Volkspartei  
Pötsching**

Elections will be held on 23 September and 2 October 2022.

**In Pötsching.**

**At home. ÖVP.**

Gladly a mayor for everyone - that's what I want to be. That is why I am running for mayor in the municipal elections on 2 October.

<p>I have been working as a municipal councillor for ten years and as a municipal councillor for Pöttsching for five years. I have been actively involved in exciting projects such as the design of the Meierhof outdoor area and in the negotiations on building sites next to the Gärtnersiedlung . We were able to implement many good ideas from all sides together in the municipal council . In addition, I have also been involved in associations and in the parish of Pöttsching. For me, the newly renovated church is a beautiful example of what can be achieved in a team .</p>	<p>In this folder you will find our candidates and, thanks to your great help, their and our ideas for Pöttsching.</p> <p>And what will be very important to me as mayor is to be there for everyone. Be reachable for everyone. For example, through fixed mayor consultation hours once a week in the evening.</p> <p>Best wishes</p>	
<p>In the coming years, we will again have major projects in Pöttsching. The team of the People's Party and I will again play an active role.</p>	 <p><b>Erwin Marchhart</b> 0681 81758989 marchhart.erwin@gmail.com</p>	

"Gladly a mayor  
for everyone!"

## Our offer:

## Good ideas for our community!

### Securing local supply

As you are used to from us, we will continue to constructively shape Pötttsching over the next five years. In addition to the cost- and timely completion of the community center, the local supply of the population is becoming increasingly important - both with food and energy. When it comes to food supply, we are fortunate that several companies already offer a lot. We will therefore support existing and new companies in expanding their offering. In the future, we will also make even greater use of local raw materials in our energy supply.

### Developing transport solutions

Traffic is an ongoing issue in Pötttsching and there is still a lot to do. On the one hand, it takes everyone's effort to comply with existing speed limits. On the other hand, it requires new concepts for better cooperation between cyclists, pedestrians and motorised traffic. Particular attention is paid to access to the Billa and Hauptstraße-Raiffeisengasse elementary school.

### Living and living

For the streets in Pötttsching we propose a program for the rehabilitation of one street/alley per year. In addition, the streets and alleys are to be embellished with trees and shrubs, preferably fruit trees. What is particularly important to us: We are not only concerned with aesthetics, but above all with the quality of life of the people of Pötttschingen (shading, air purification, increasing humidity). We support residential building renovations in the town centre in order to further enliven it. This also includes affordable living for young people, as well as the addition of equipment especially for the young at heart to the fitness course at dreierzwickel.

### Some of these ideas sound familiar to you?

That's a good thing, because we try to implement suggestions and ideas that come from you. Our goal is: A home in which we live well and happily. We are looking forward to many more ideas to continue on this path together. With your vote, we can implement these projects.

### Our ideas at a glance:

Traffic calming through more mobile speed displays [with frequent changes of location)	Mayor's consultation once a week in the late afternoon/evening and also mobile (mayor comes to you to get an idea on site ]
More offer for cyclists: Making cycling in the village safer , especially to school and shopping	Further support for renovation/use of living space in the town centre/ of existing buildings
Rehabilitation of one street/alley per year	Use of alternative energy to heat schools and public buildings
Planting fruit trees in open areas of the municipality	Extension of the fitness course at the Dreierzwickel with equipment for the young at heart
Timely and cost-effective completion of the community center	Developing affordable housing for young people
Additional opening hours of the garbage collection point	

# This is how you choose correctly.

There are 2 ballots:

- Mayor's election (Put a cross with **Erwin Machart**)
- **Municipal**council election (övp party and max. **3 crosses** for candidates of the ÖVP)

- I. Brought forward on Friday, 23 September 2022 (at the polling station)
- II. On election day, Sunday, 02 October 2022 (at the polling station)
- III. By postal vote
  - a. Request a voting card (municipality)
  - b. Fill out the ballot paper (independently)
  - c. Submit your voting card (municipality/post)
